

Introduction to Python

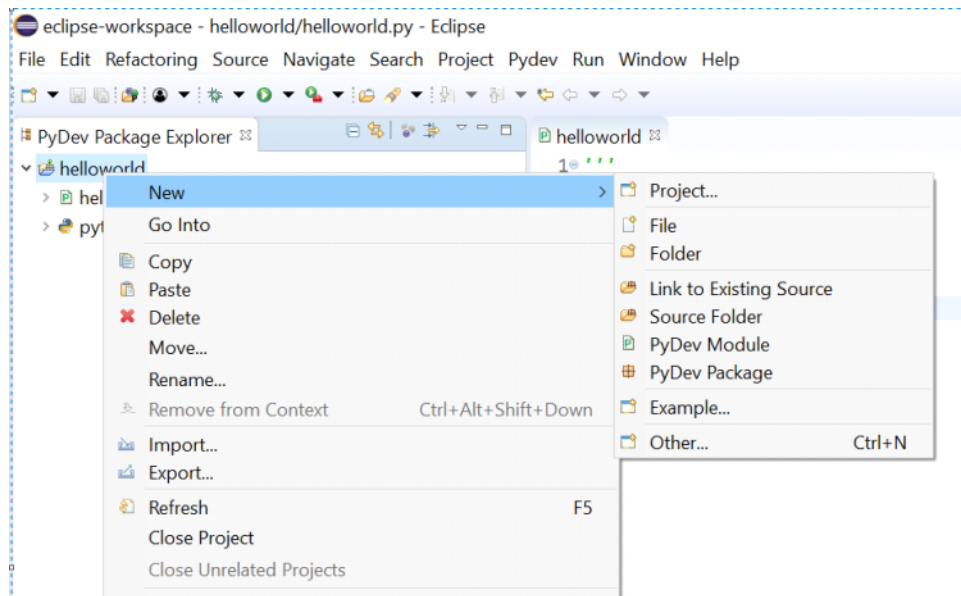

Tuesday, April 17, 2018 5:06 PM

On 4/17/2018:

1. Login to github.
2. Download python and eclipse.
3. Python Installation.
 - a. Add Python to path during the installation process.
4. Safari books online
 - a. Techbus.safaribooksonline.com (free with Oracle Single sign on)
 - b. Learning Python (Fabrizio Romano)
 - c. Head First Python, 2nd edition.
5. Eclipse Installation.
 - a. Eclipse IDE for Java Developers
 - b. Workspace: C:\Users\sisinga\eclipse-workspace
 - c. Download and install "PyDev" from Eclipse marketplace.
 - d. Go to Window -> Preferences -> PyDev -> Interpreters -> Python Interpreter -> "Quick Auto-config" (refer to the picture below). Hit Apply and Close. (It might take few minutes to finish this step).

- e. File -> new -> PyDev project -> project name : helloworld and then click "Finish"
- f. Under "PyDev Package Explorer"; right click on helloworld -> New -> PyDev Module (refer to the screenshot below)

g. Type the name as "helloworld" and hit "Finish"
